

chap-1 Living and Non-living things.

Summary of chapter-1

Natural things - Things like plants, animals, birds, insects, clouds, rocks, air, water, stars, sun, moon are given by nature. These things are called natural things.

Man-Made things - Things which are created by man are called man made things.
eg. Table, chair, car, pen, box, pencils etc.

Difference between natural things and non-living things

Things which are made by nature are called natural things and which are made by human are called man-made things.

Living things - The things which have life are called living things. ex- man, tree, animals, birds. All living things are natural things.

Characteristics of living things

- 1) All living things grow.
- 2) All living things need air to breathe.
- 3) All living things need food and water to grow and to get energy for work and play.
- 4) Living things feel changes.
- 5) Living things can move.
- 6) Living things produce more of their kind.

Environment :- All living and non-living things around us affect our life and make our environment.
